

## SystemOne Guide

Downloading, importing and using the searches to identify adult patients with asthma potentially eligible for Fostair® (beclometasone/formoterol).

**This promotional search tool has been fully funded by Chiesi Ltd and developed by Oberoi Consulting Ltd.**

Chiesi is providing this search tool to support clinicians in identifying adult asthma patients potentially eligible for Fostair® (beclometasone/formoterol) [BDP/FF]. The search tool does not replace clinical judgement. Chiesi recommends that all patients are reviewed to determine whether further investigations are required prior to optimising pharmacological therapies or changing non-pharmacological interventions. This enables the healthcare professional to make an informed decision regarding the most appropriate intervention, in collaboration with the patient. It is the responsibility of the healthcare organisation to access the list of patients generated by the searches and to clinically review the patients identified. Please note that Fostair® may not be appropriate for all patients identified by this tool. Patient cohorts have been broken down by severe exacerbations (oral corticosteroid issues as a surrogate marker) and/or SABA to indicate current symptom burden and potential future risk of exacerbations. This approach supports the identification of patients who may have a higher-risk disease profile. Please note Fostair® is indicated for the maintenance treatment of asthma in adults where use of a combination product is appropriate (please see full licensed indication).

### Fostair® Licensing Information

**Fostair® 100/6 (pMDI and NEXThaler) and 200/6 (pMDI and NEXThaler) are indicated in the regular treatment of asthma in adults where use of a combination product (inhaled corticosteroid and long-acting beta2-agonist) is appropriate:**

- patients not adequately controlled with inhaled corticosteroids and 'as needed' inhaled rapid-acting beta2-agonist or
- patients already adequately controlled on both inhaled corticosteroids and long-acting beta2-agonists.

**Fostair® pMDI 100/6 and Fostair® NEXThaler 100/6 are licensed for maintenance and reliever therapy (MART). Fostair® MART (100/6 only) should especially be considered for adult patients with:**

- not fully controlled asthma and in need of reliever medication
- asthma exacerbations in the past requiring medical intervention

**Fostair® Prescribing Information** can be found via this link: <https://www.chiesi.co.uk/hcp/prescribing-information-2/#fostair>

**Adverse events** should be reported. Reporting forms and information can be found at <https://yellowcard.mhra.gov.uk> or search for MHRA Yellow Card in the Google Play or Apple App Store. Adverse events should also be reported to Chiesi Limited on 0800 0092329 (UK) or [PV.UK@Chiesi.com](mailto:PV.UK@Chiesi.com).

- Accessing patient records

## Purpose of the guide

The purpose of this step-by-step guide is to provide healthcare organisations with a clear and concise set of instructions to download and import the search tool within the SystemOne clinical prescribing system.

If you require any technical assistance throughout the process, please contact the technical support team.

# How the searches appear in SystemOne

## Folder Structure

Once the search tool is imported, the folder structure will appear as follows:

- ^ [Icon] Adult asthma may be eligible for Fostair BDP FF
  - Patients for review (15) ←
  - zBackground Do Not Use I Fostair Asthma (40)
  - zBackground Do Not Use I Fostair Asthma Inhalers (31)
  - zBackground Do Not Use I Fostair Exclusion (4)

## Searches

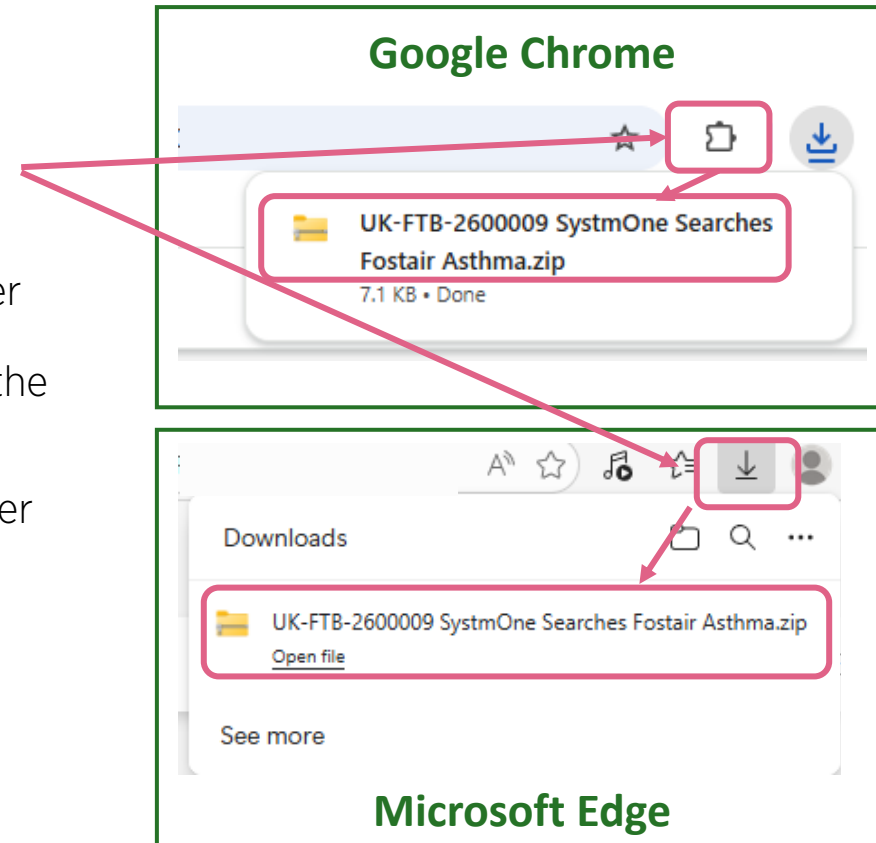

Open the **Patients for Review** folder, the searches will display as follows:

- Name ▾
- 1. Adult patients with asthma on ICS monotherapy (in last 4m)
    - 1a. Pts with  $\geq 2$  OCS and  $\geq 12$  SABA in last 12m
    - 1b. Pts with 1 OCS and  $\geq 12$  SABA in last 12m (excl. 1a, 1b)
    - 1c. Pts with 1 OCS and  $\geq 6$  SABA in last 12m (excl. 1a, 1b)
    - 1d. Pts with  $\geq 12$  SABA in last 12m (excl. 1a, 1b, 1c)
    - 1e. Pts with 1 OCS and 3-5 SABA in last 12m (excl. 1a, 1b, 1c, 1d)
    - 1f. Pts with  $\geq 1$  OCS and 1-2 SABA in last 12m (excl. 1a, 1b, 1c, 1d, 1e)
    - 1g. Pts with 6-11 SABA in last 12m (excl. 1a, 1b, 1c, 1d, 1e, 1f)
    - 1h. Pts with 3-5 SABA in last 12m (excl. 1a, 1b, 1c, 1d, 1e, 1f, 1g)

## Downloading the search tool

NB: Each computer setup is different; with each browser and operating system producing slightly differing results and appearances.

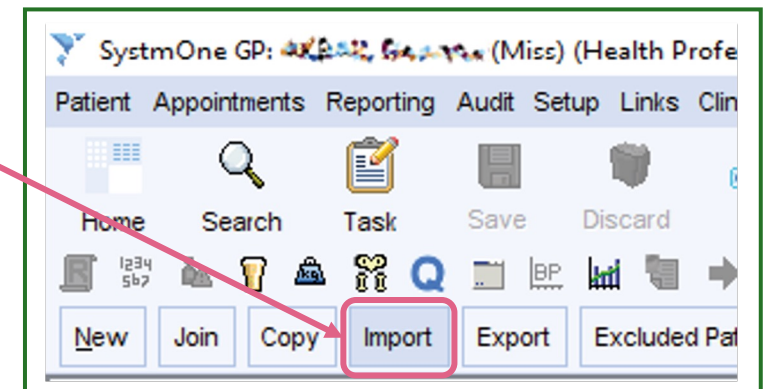

- Step 1:** Click on the secure link that you will have received via email post registration, to download the searches.
- Step 2:** If using Google Chrome or Microsoft Edge, the “Downloads” message will appear at the top right corner of the browser screen, as shown below, or click on the **Download arrow** then click on the **folder icon** to show the download’s location.
- Step 3:** To unzip the file, access the Downloads folder, or wherever the file was saved, and either **double-click** the Zip file or **right-click** on the Zip file, then select **Extract All** to the Desktop, or select another memorable location
- Step 4:** The **search tool folder** is now available on the user’s Desktop (or chosen location), ready to be imported into SystmOne.

# Importing the searches

**Step 1:** Select Reporting from the SystemOne top menu then access Clinical Reporting from the dropdown menu

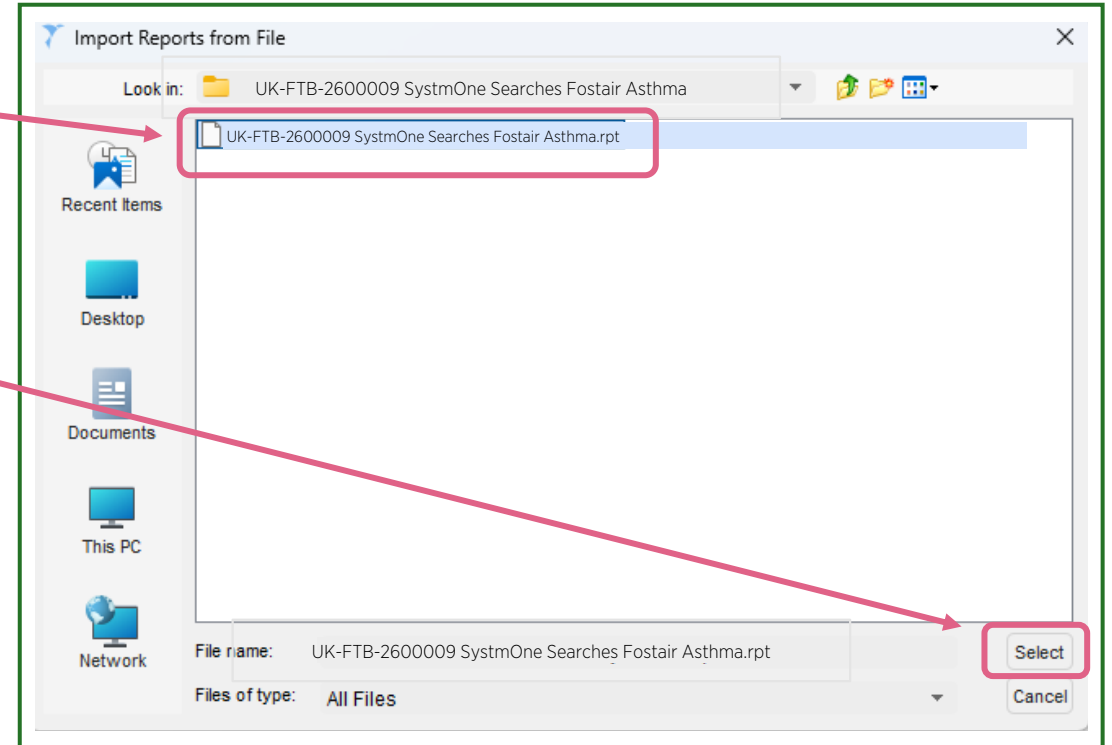

**Step 2:** Click on Import from the ribbon menu

# Importing the searches

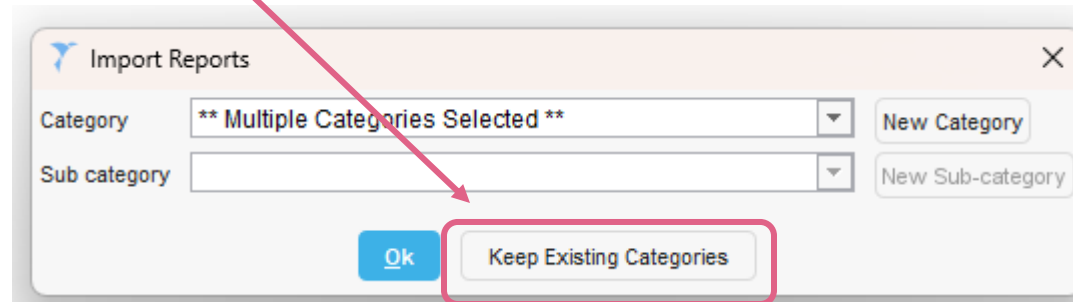

**Step 3:** Navigate to the **xml file** containing the searches

**Step 4:** Click **Select** to confirm the import all of the searches contained in the folder the searches

## Importing the searches

**Step 5:** A dialogue box will appear, click **Keep existing categories**

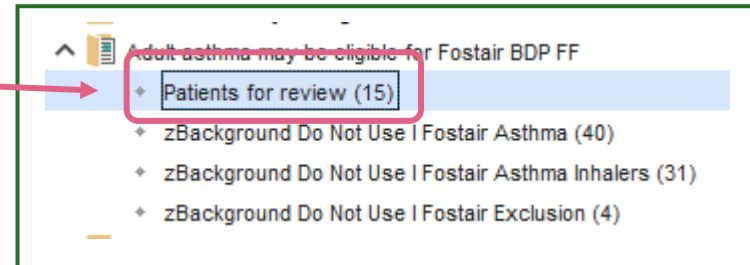

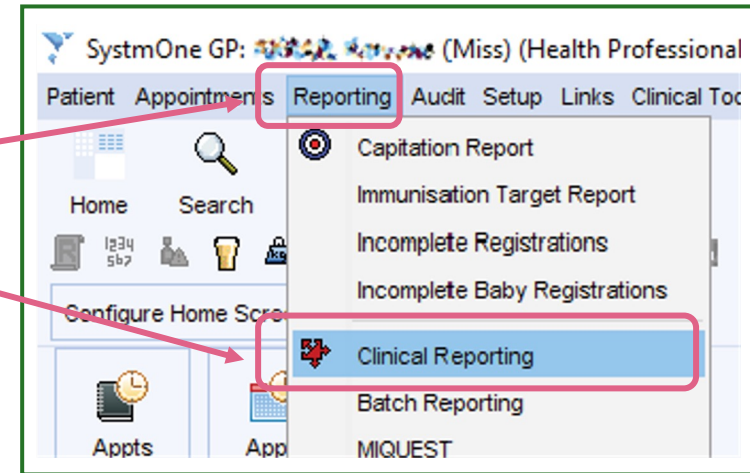

A screenshot of a software dialog box titled 'Import Reports'. The dialog has a title bar with a close button (X) on the right. It contains two rows of controls: 'Category' with a dropdown menu showing '\*\* Multiple Categories Selected \*\*' and a 'New Category' button; and 'Sub category' with an empty dropdown menu and a 'New Sub-category' button. At the bottom, there are two buttons: a blue 'Ok' button and a white 'Keep Existing Categories' button. A red arrow points from the text 'Step 5' to the 'Keep Existing Categories' button, which is also highlighted with a red rectangular border.

# Running the searches

**Step 1:** Select **Reporting** from the SystemOne top menu then access **Clinical Reporting** from the dropdown menu

**Step 2:** Expand **Local Reports** within Clinical Reporting

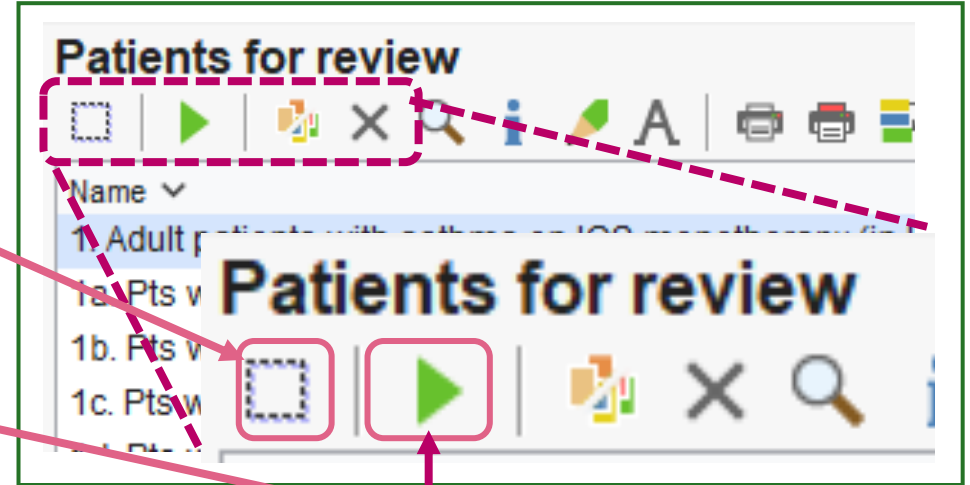

**Step 3:** Select the **search tool folder** and click on the **Patients for review** subfolder

# Running the searches

Step 4: Select all the reports using the dashed square icon

Step 5: Select the green run icon

## Accessing patient records

**Step 1:** To view the patients, highlight the search and click on the magnifying glass

**Step 2:** Right-click on the patient name and select Retrieve Patient to access the patients record
