

## SystemOne Guide

Downloading, importing and using searches to identify patients with moderate-to-severe Chronic Obstructive Pulmonary Disease (COPD) potentially eligible for Trimbow® (beclometasone/formoterol/glycopyrronium).

**This promotional search tool has been fully funded by Chiesi Ltd and developed by Oberoi Consulting Ltd.**

Chiesi is providing this search tool to support clinicians in identifying adult patients potentially eligible for Trimbow® (beclometasone/formoterol/glycopyrronium) [BDP/FF/G]. The search tool does not replace clinical judgement. It is the role of the healthcare organisation to assess the list of patients generated by the searches, to clinically review the patients identified and optimise their medication accordingly. Patient cohorts have been broken down by exacerbations (using antibiotic and oral corticosteroid issues as a surrogate marker for moderate exacerbations) and MRC to indicate severity. Please note Trimbow® is indicated for moderate-severe COPD (please see full licensed indication), clinical judgement will need to be used to assess the severity of COPD, ideally using spirometry.

**Trimbow® Licensing Information** Trimbow® pMDI 87/5/9 and Trimbow® NEXThaler 88/5/9 are licensed for the maintenance treatment of moderate to severe COPD in adults who are not adequately treated by a combination of an inhaled corticosteroid and a long-acting  $\beta$ 2-agonist or a combination of a long-acting  $\beta$ 2-agonist and a long-acting muscarinic antagonist.

**Trimbow® Prescribing Information** can be found via this link <https://www.chiesi.co.uk/hcp/prescribing-information-2/>

**Adverse events** should be reported. Reporting forms and information can be found at <https://yellowcard.mhra.gov.uk> or search for MHRA Yellow Card in the Google Play or Apple App Store. Adverse events should also be reported to Chiesi Limited on 0800 0092329 (UK) or [PV.UK@Chiesi.com](mailto:PV.UK@Chiesi.com).

# How the searches appear in SystmOne

## Folder Structure

Once the search tool is imported, the folder structure will appear as follows:

- ^ [Icon] Adult COPD may be eligible for Trimbow BDP FF G
  - ◆ Patients for review (33) ←
  - ◆ zBackground Do Not Use I Trimbow COPD (39)
  - ◆ zBackground Do Not Use I Trimbow COPD Exclusion (5)
  - ◆ zBackground Do Not Use I Trimbow COPD Inhalers (29)

## Searches

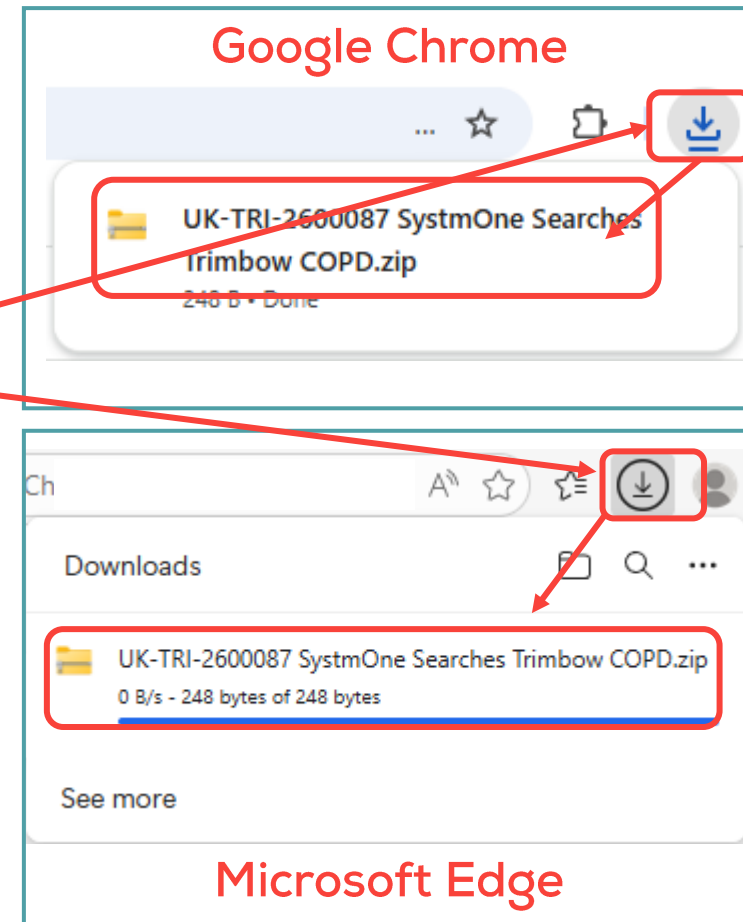

Open the Patients for Review folder, the searches will display as follows:

The screenshot shows a list of search results under the heading "Patients for review". The results are organized into two main categories: "1. Adult pts with COPD on ICS/LABA (in last 4m), no LAMA" and "2. Adult pts with COPD on ICS/LABA + LAMA (in last 4m)". Each category has sub-items (a, b, c) and further sub-items (i, ii, iii) detailing specific criteria like hospitalisation, eosinophils levels, and symptom load. A red arrow from the "Patients for review" folder in the left panel points to the top of this screenshot.

## Downloading the search tool

NB: Each computer setup is different; with each browser and operating system producing slightly differing results and appearances.

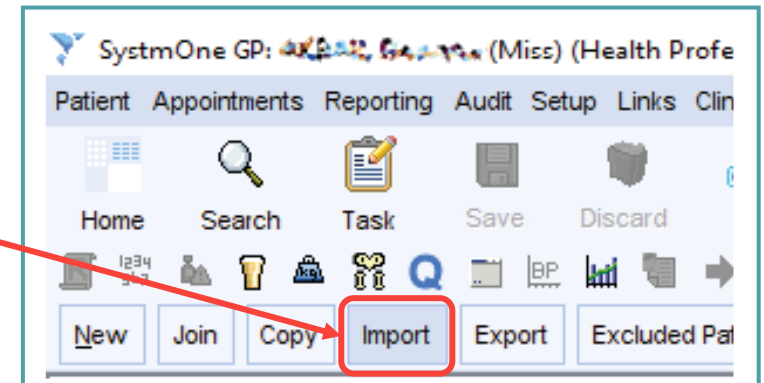

- Step 1:** Click on the secure link that you will have received via email post registration, to download the searches.
- Step 2:** If using Google Chrome or Microsoft Edge, the “Downloads” message will appear at the top right corner of the browser screen, as shown below, or click on the **Download arrow** then click on the **folder icon** to show the download’s location.
- Step 3:** To unzip the file, access the Downloads folder, or wherever the file was saved, and either **double-click** the Zip file or **right-click** on the Zip file, then select **Extract All** to the Desktop, or select another memorable location
- Step 4:** The search tool folder is now available on the user’s Desktop (or chosen location), ready to be imported into SystemOne.

## Importing the searches

**Step 1:** Select Reporting from the SystemOne top menu then access Clinical Reporting from the dropdown menu

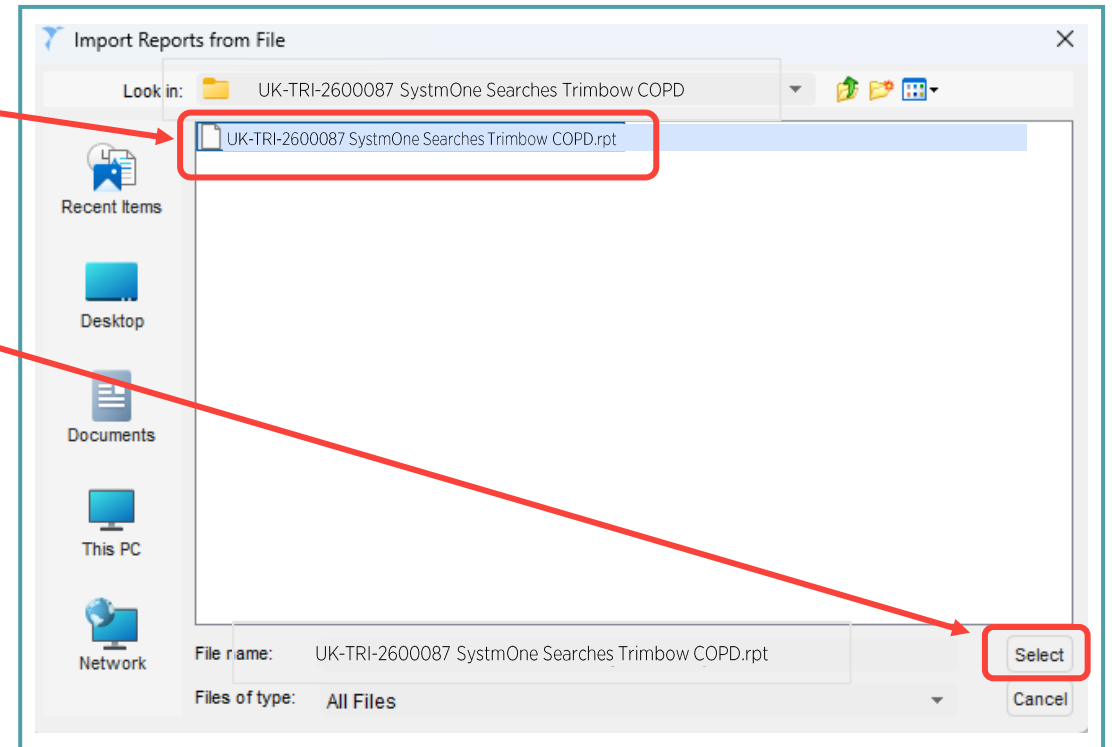

**Step 2:** Click on Import from the ribbon menu

## Importing the searches

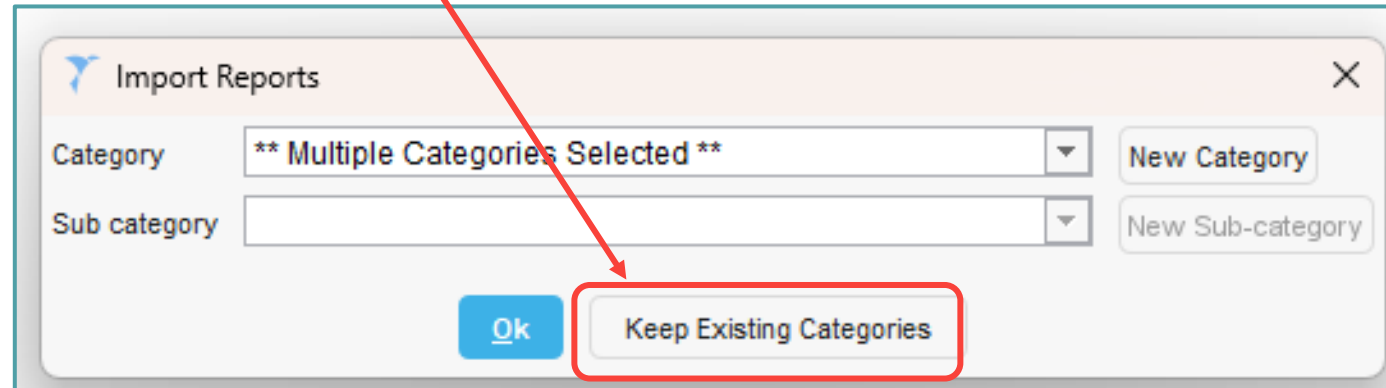

**Step 3:** Navigate to the saved search tool folder and double click to open. Highlight the file, click on the .rpt file and click Select

**Step 4:** The screen displays a message that the searches have been read (ready for importing). Click on OK to continue

## Importing the searches

Step 5: A dialogue box will appear, click Keep Existing Categories

Import Reports

Category: \*\* Multiple Categories Selected \*\*

Sub category:

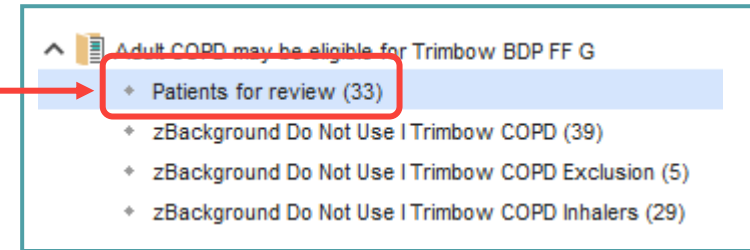

Buttons: Ok, Keep Existing Categories, New Category, New Sub-category

## Running the searches

**Step 1:** Select Reporting from the SystemOne top menu then access Clinical Reporting from the dropdown menu

**Step 2:** Expand Local Reports within Clinical Reporting

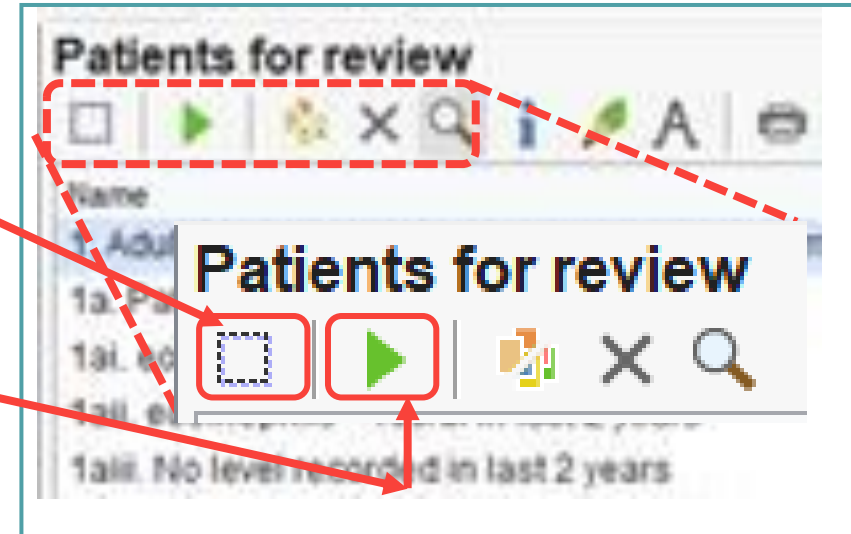

**Step 3:** Select the search tool folder and click on the Patients for review subfolder

## Running the searches

Step 4: Select all the reports using the dashed square icon

Step 5: Select the green run icon

## Accessing patient records

**Step 1:** To view the patients, highlight the search and click on the magnifying glass

**Step 2:** Right-click on the patient's name and select Retrieve Patient to access the patients record
